TRUCK SAFETY RESTRAINTS

Prevent an Accident *Before It Happens.*

High turnover of forklift drivers and temporary workers leads to more risk. Be confident the trailer is locked in place.

Save Time at the Dock.

LED-lights mean simple communication between the truck driver and the forklift driver. More automation gives you flexibility at the dock.

What Type of Truck Restraint Do You Need?

Your partners at BEW help you from the beginning to the end. BEW consults with you, advises you, and engineers solutions to your specifications. The well-trained installers at BEW finish your job right the first time. No return visits required.
